

Data Sheet Accessory Code: **CW-S-S1**

Accessory Description: **Choice Wall Shelf 325mm L x 542mm W**

General Images of the Product Range Features

Choice Wall Shelf 325mm L x 542mm W

Product Code

CW-S-SI

The "Choice" range of products and accessories allows the user to support a tablet computer, laptop, monitor and touch screen monitor, (the device) at the correct ergonomic height for sitting or standing. By allowing the device to be supported at different angles "Choice" also facilitates direct data input and or viewing preferences.

This cost effective solution offers simple adjustment that automatically locks in place at the desired height, or viewing angle, if the device has a protective cover this can remain in place.

Base & Support Arms

The Choice Shelf offers a larger flat more traditional work surface area, constructed from High Density Fibre Board with an Aluminium support. The shelf height is easily adjusted by simply tilting up slightly and then moving to the desired working height. The height is locked automatically once the user tilts the shelf back in the locking position
