

Elevate yourself

Freedom to move gives you freedom to think. Discover a whole new working experience-free, flexible and dynamic. Neo One seamlessly gives you the freedom to adapt to any situation. Sit, stand, work or play.

01

Reach New Heights

We all know we need to be more active, but there is increasing evidence that we also need to spend less time sitting down. The Neo One Choice range is available with a unique height adjustment locking mechanism called "Synchro" (International Patents Pending) that enables the Shelves to automatically lock at any position without the need to use hand wheels or clamps.

Sitting

Infinite Adjustment

Standing

Dynamic working

Healthy Mind, Healthy Body

A key priority of improving health is to stand more, ideally every hour so we can increase metabolism and reduce health risks. A sedentary lifestyle has been historically proven to increase the risk of serious conditions. Being able to position a tablet, laptop or computer monitor at the correct ergonomic position reduces repetitive strain injury, shoulder/neck strain injuries and computer vision syndrome.

Seamlessly Free

01

Ergonomics

Ergonomically the optimum monitor viewing position is for the eyes to be slightly lower than horizontal when either seated or standing. Most monitors are used with the viewing screen tilting backwards between, 10-15 degrees, therefore on the desk Choice models, we have tilted the support pillar back 10 degrees. However the needs when direct data inputting into a viewing screen contrasts significantly arms should be substantially horizontal and the screen viewable from above, resulting in a 45-60 degree angle.

Neo One Choice has been ergonomically designed to accommodate all degree variations from one single unit allowing optimum comfort, freedom and choice on an individual basis.

02

Free to adapt

When using a laptop ordinarily the angle can be reduced by tilting the keyboard upwards which in turn lifts the viewing screen to a more comfortable viewing angle for the user. Neo One Choice incorporates all conflicting requirements in the one product, making it compatible to be used with a laptop, tablet computer and touch screen monitor, either with or without a separate keyboard.

03

Big Screen

The Clamp option stops a Laptop or Tablet Computer from lifting up, when used with the Gripping Ridges on a Combination Shelf it prevents items being accidentally knocked off the shelf making them ideal for users with additional needs.

The strength of the Neo One Choice platform and support Pillar make it ideal for supporting large screens and touch screens monitors. The 200mm VESA Plate allows forward and backward tilting and infinite height adjustment within the 700mm range.

04

Sizes

Do you need to work at a desk, bench or kitchen worktop? Neo One Choice is available in lengths of 600 or 750 mm with a selection of platform options to accommodate most laptops, tablets, touch screen monitors and computers. The adjustment range also allows you to work sitting or standing. (Other sizes are available on request subject to quantity).

05

Wall mounted

The Neo One Choice wall mounted option allows the user to create space and comes with an additional option of integrated power and audio visual connections that can be configured to individual requirements.

06

Rubber Grip

The unique over-moulded combination shelf reassuringly grips and holds any device firmly in place. The raised ridges enable the angle of the tablet computer to be easily inter-changed for either typing, drawing, data input or viewing. It also allows a laptop keyboard to be tilted upwards lifting the screen closer to the users eye level. The tops of the raised ridges are flat allowing them to grip any device placed on them.

07

Rubber Base

The Neo One Choice base unit can also be used to provide a home to your laptop or tablet device. In addition it can also be positioned to the users most convenient angle and allow seamless drag and drop functions to any attached or separate monitor screens. The base also comes with an option to provide concealed fixings to enable it to be securely fixed to any surface.

08

Combination Shelf

The unique combination shelf comprises of two shelves that can be used together, separately or folded away. The larger over-moulded shelf boasts a full range of angles to accommodate all positions required for viewing, typing and data input. The shorter shelf allows comfortable viewing without the unused section of the larger shelf being visible.

Do I need to remove the cover on my tablet before using? No there is no need to remove the case or cover. Neo One Choice has been designed specifically to support your device with or without a cover to allow complete flexibility between tablets, monitors and laptops and more conveniently to accommodate seamless uninterrupted changes of use between landscape and portrait configurations.

09

Portable

The Neo One Choice base unit version can be stacked up to 4 high allowing clever and convenient storage to create space.

10

Light

Ideal for point of sale or as an ambient light source, the lighting kit can be factory or retro fitted. As standard the colour is "Daylight White" other colours are available on request subject to quantity. Screen printing the light cover can create a fixed or mobile dynamic point of sale experience.

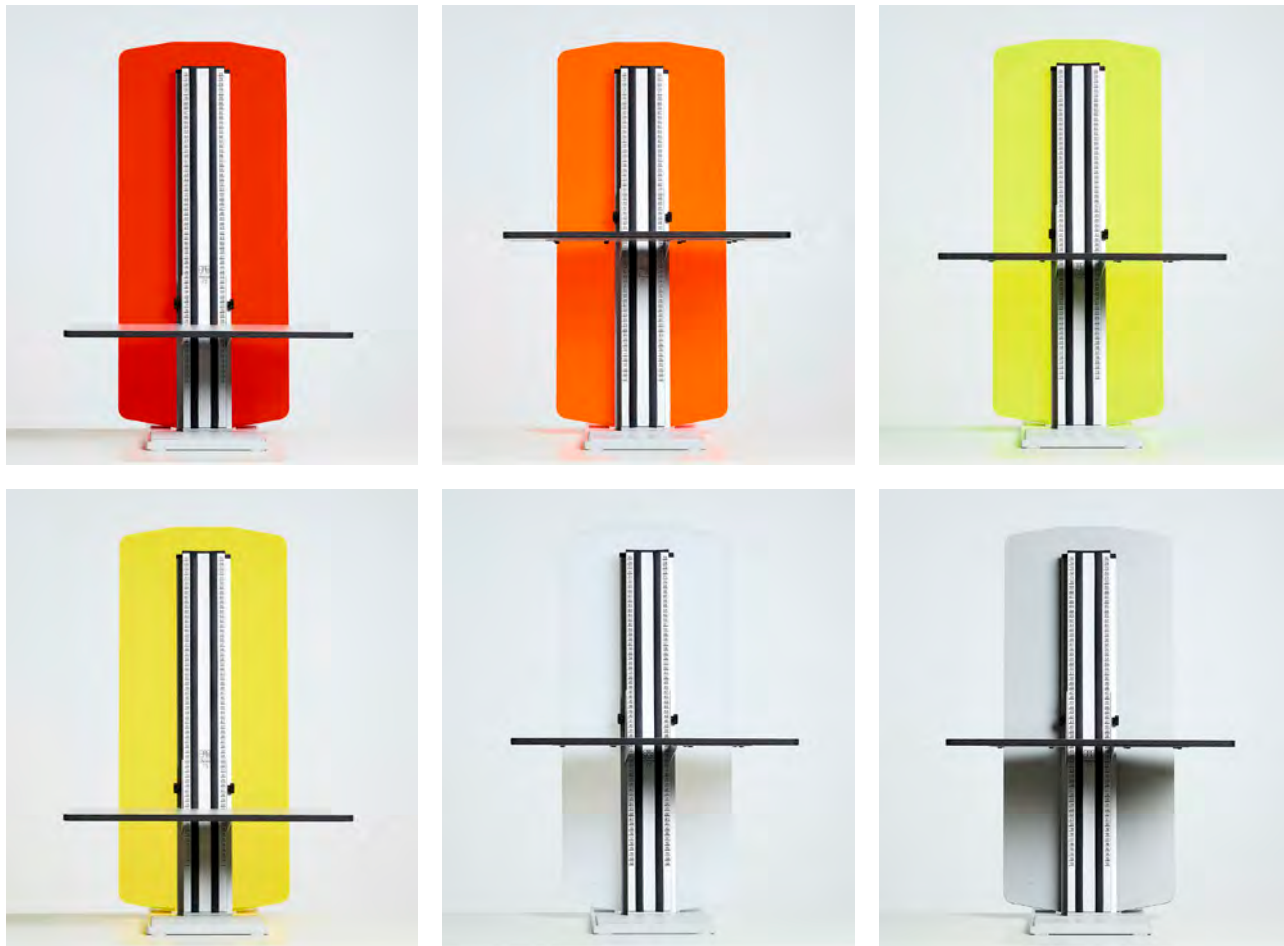

A touch of colour
and privacy

Colours

When used sitting or standing the Neo One Choice screen allows complete privacy from colleagues or other users in close proximity. Ideal for use in multi-space environments such as shared office facilities, open plan offices, libraries, public spaces and educational facilities. The Light Grey – HDF is the most economical and gives total privacy. The perspex polar and fluorescent colours provide an opaque and exciting environment with highlighted intense edge detail. Height 825mm x Width 355mm (overall height when fixed 825mm).

Acoustics

Additional acoustic socks can be provided to fit over any screen to help with sound absorption, ideal for use in open plan environments. As standard this is supplied in a camira racer nutrition fabric, but other fabrics are available subject to order quantity.
